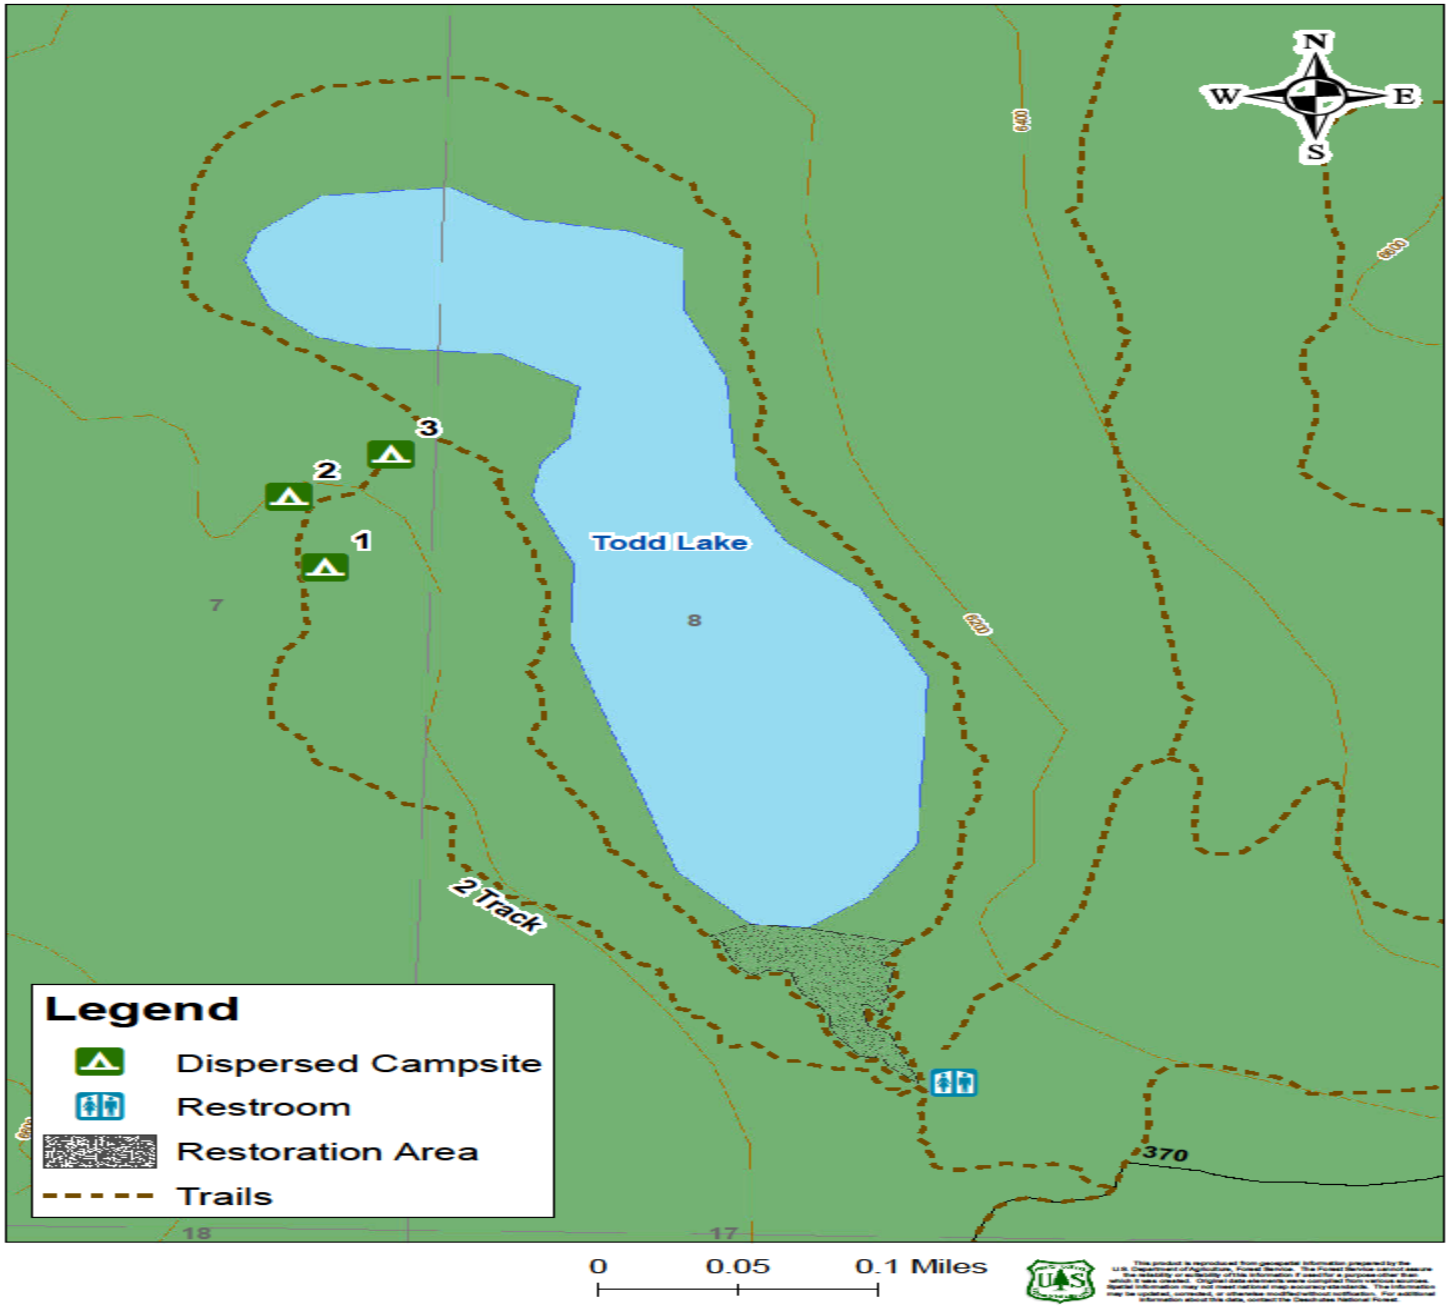
Todd Lake Camp Ground Restoration Project – August 2012

Upper Deschutes River Coalition
Project Manager
Grant from the
National Forest Foundation

Todd Lake Dispersed Campsites and Trails



UDRC Scope of Work

- Remove the old fence at the outlet of the lake that protects the riparian zone and replace with a new one. There is approximately 2000' of fence replacement.
- Installation of small signs on/near the fence that indicate that the area behind it is a restoration area and should not be walked on.
- Maintain the three campsites on the northwest side of the lake. Remove the collapsing picnic tables and the concrete blocks that used to be fire rings. Replace fire rings with metal ones and install them with concrete so that they cannot be moved. Install posts to indicate campsites like those found at Devil's Lake. General clean-up of campsites and naturalize illegal campsites around the lake.
- Fix/paint the Todd Lake sign near the outlet.
- Remove redundant signs and consolidate messages to avoid sign pollution at the lake.
- General rehab and cleanup of all areas around the lake.

USFS Work

- Remove old/broken tables and benches from around the outlet and replace with new ones.
- Have a map of campsites at the trailhead so that campers know where sites are and how to get to them.
- Provide a wildflower guide to visitors that they use around the lake and then return to the bulletin board when they are done using it.
