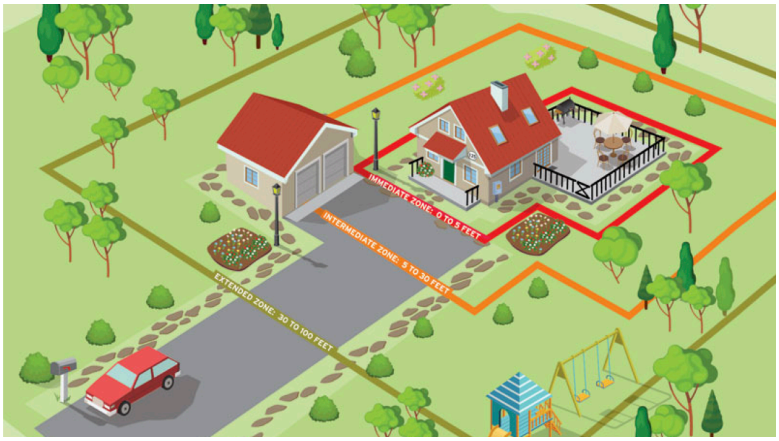
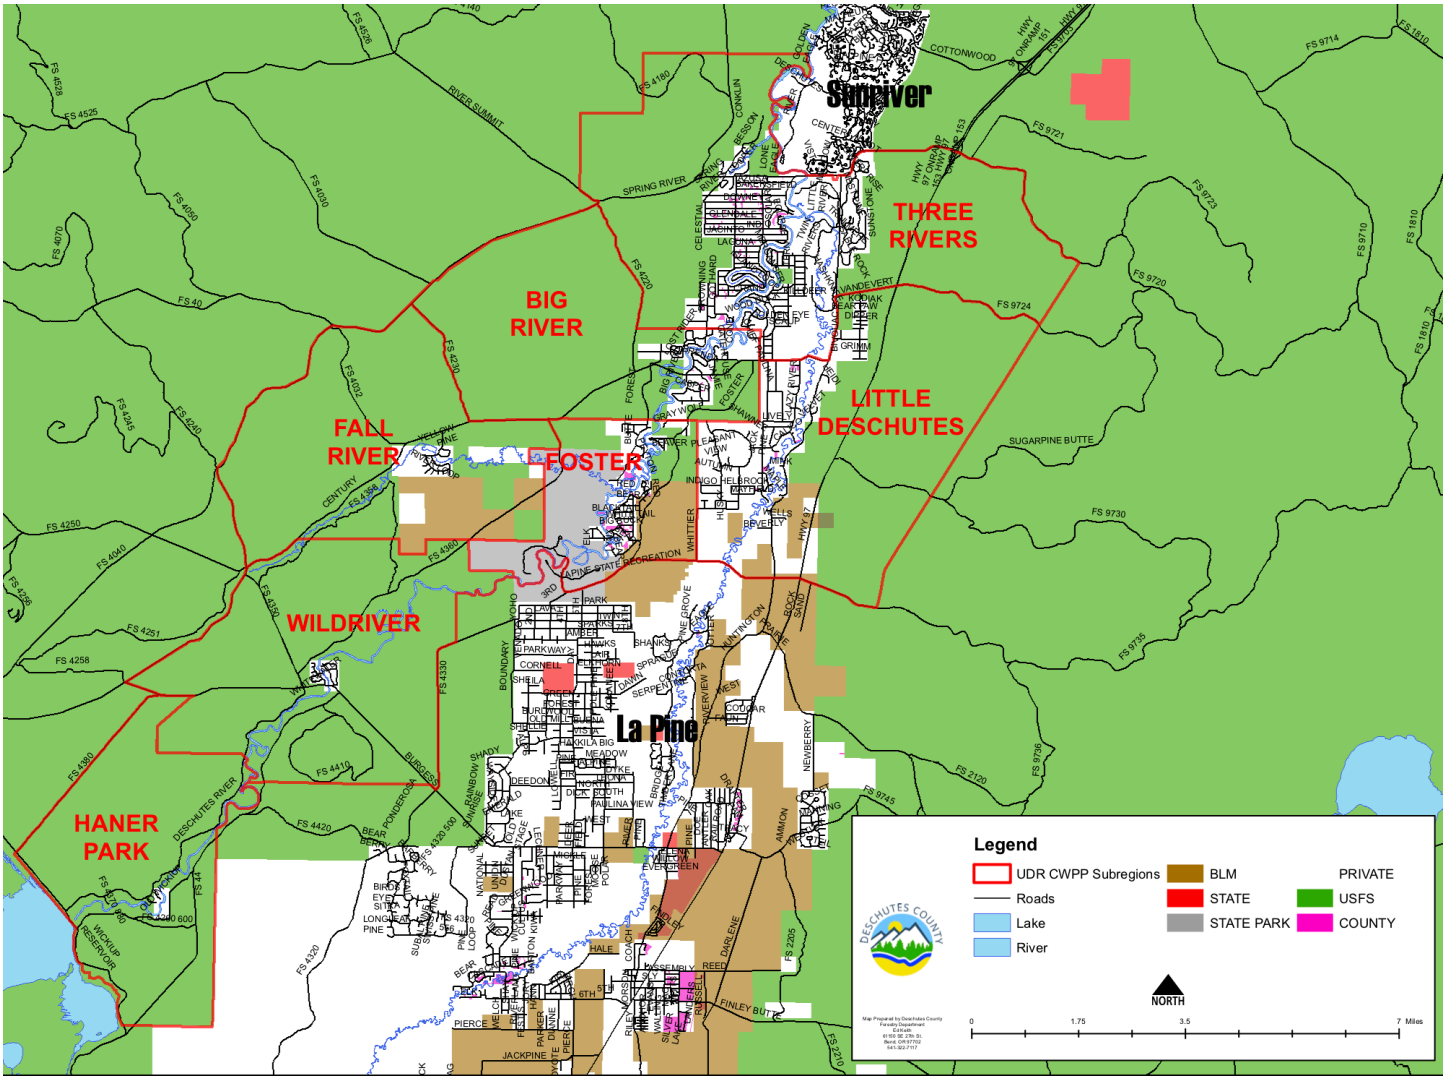
Wildfire Defensible Space Program
for Low-income Senior or Low-income Disabled Homeowners



Upper Deschutes River Communities (UDRC) has partnered with Council on Aging (COA) to provide free wildfire fuels reduction services for low-income senior or low-income disabled homeowners in the La Pine Rural Fire Protection District.


If you want to participate in this program and meet the income and age or disability requirements, please fill out the Defensible Space Application Form and mail to UDRC. UDRC will accept as many qualified applicants as resources allow. A representative from UDRC will asses your property and propose a fuels reduction project to improve your defensible space for a wildfire.
